

# CALL WAITING / CANCEL CALL WAITING

## No more worrying about missed calls.

### **How to use:**

When you are talking and another call comes in you will be alerted by a beep tone. This tone will repeat in about 10 seconds.

### **To answer the second call:**

Depress the “switchhook” for about one second to place your first call on hold. You will automatically be connected with the second caller.

### **To alternate between calls:**

By depressing the “switchhook” for about one second, you may alternate between calls. Each conversation is private and cannot be heard by the other caller.

### **To terminate either call:**

You must be talking to the caller you wish to terminate, simply hang up the phone. Your phone will ring, and when you pick it up you will be connected to the other caller.

### **To cancel call waiting:**

Lift the handset and listen for dial tone.

Press \*70. Now dial the number you are calling. Note: Call waiting is cancelled for this call only and must be done for each call you do not want interrupted.
